

Figure 4 Cost-performance frontier — CMV-SDSE is the sole non-dominated policy

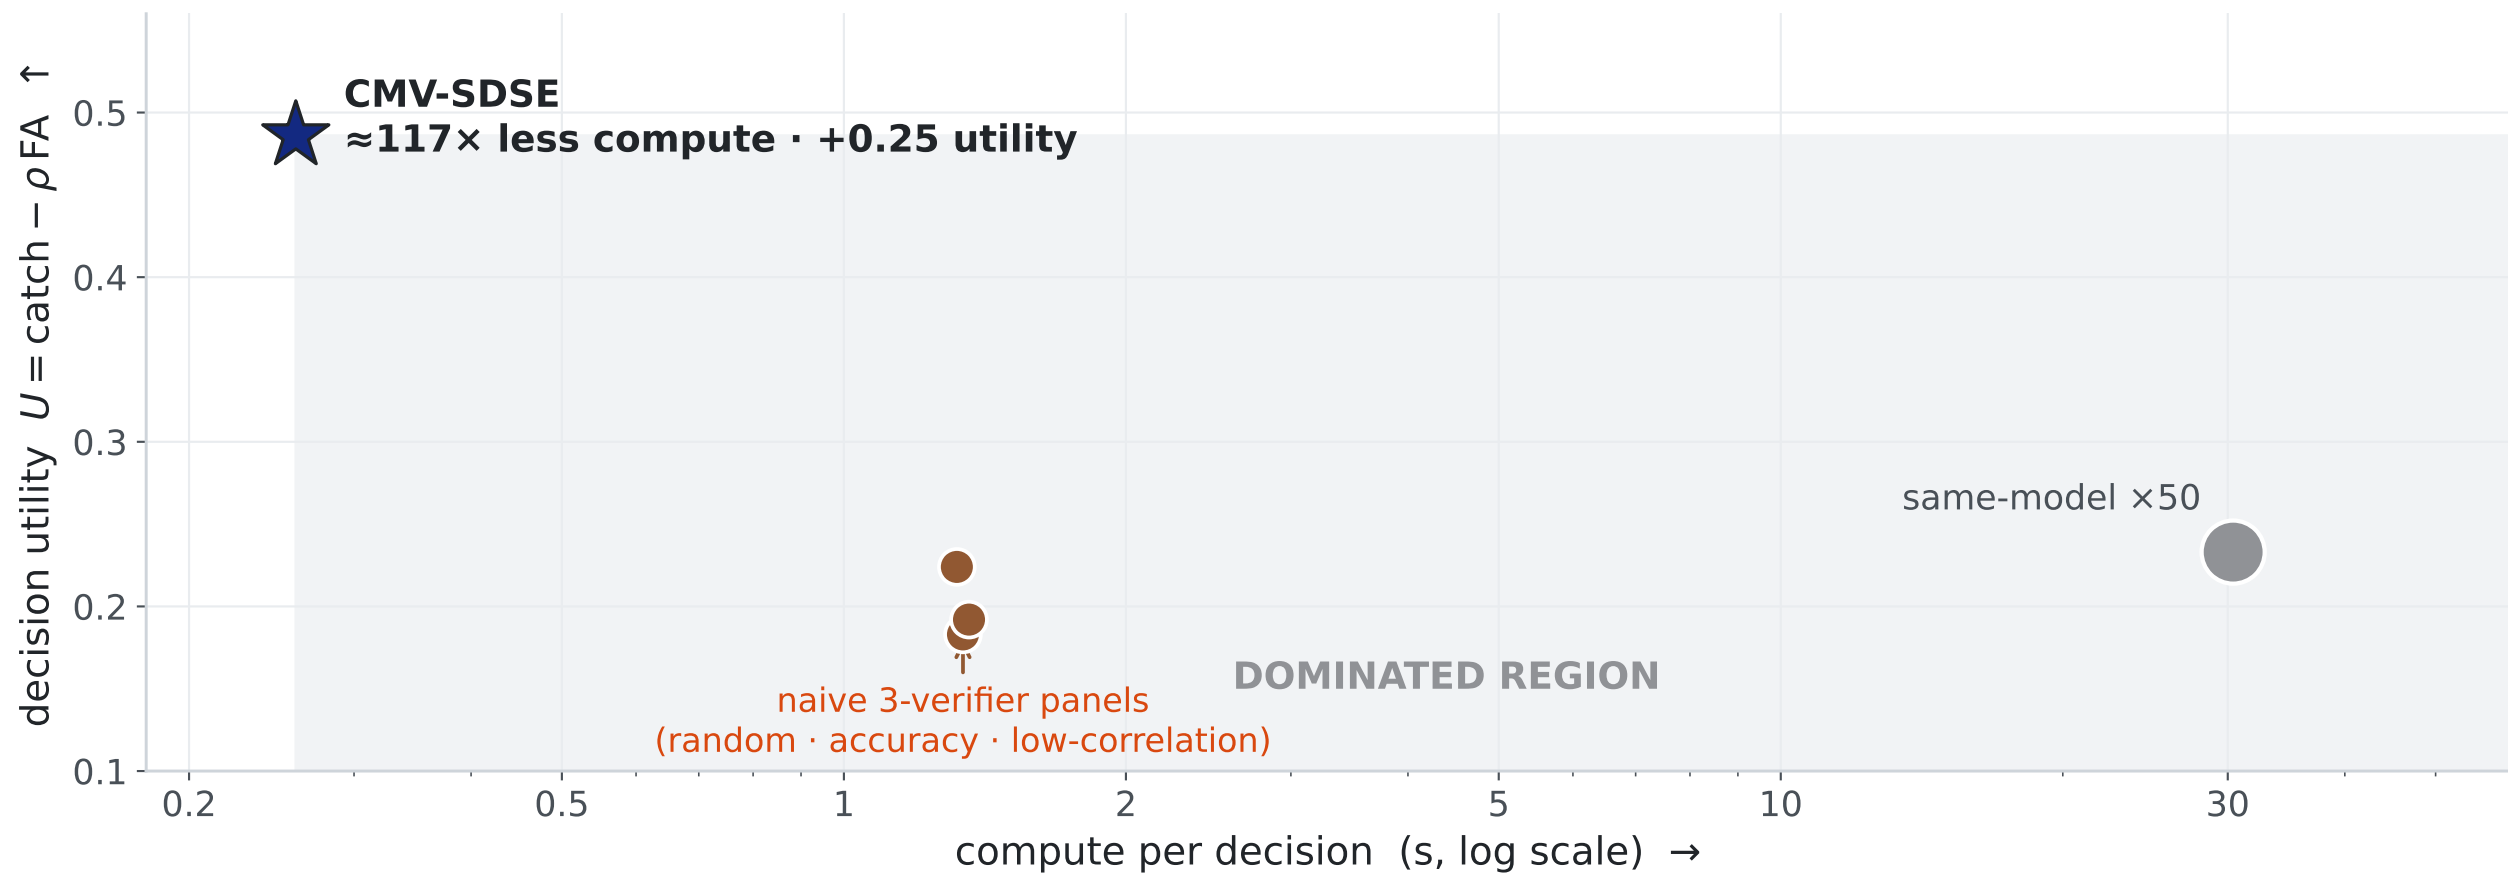

Figure 6 Redundancy persists beyond 14B — the magnitude shifts with the checkpoint

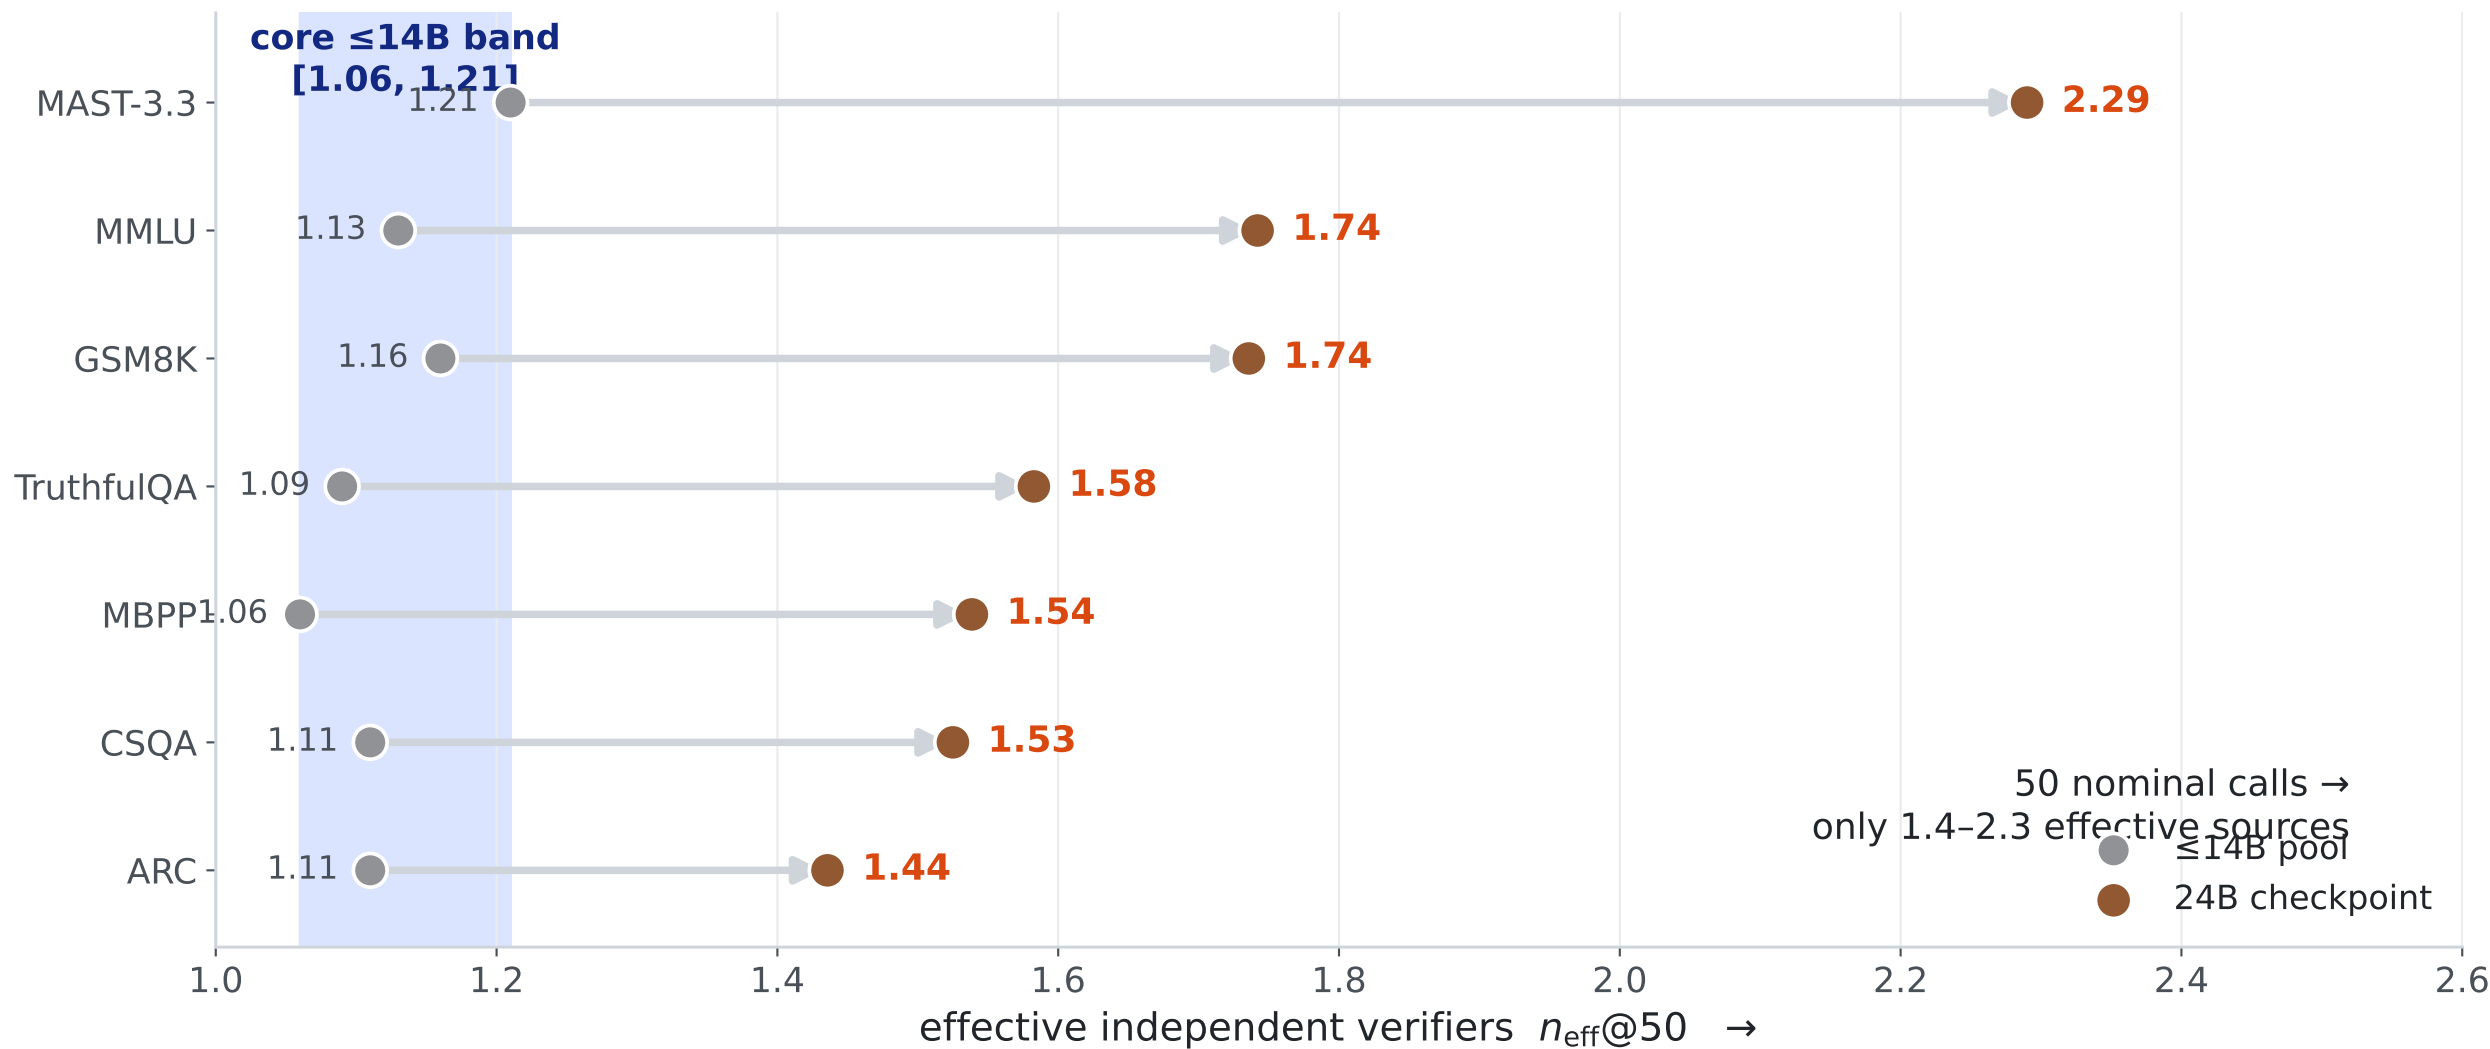

Figure 11 Evidence saturates: nominal effort, early catch plateau, residual false alarms

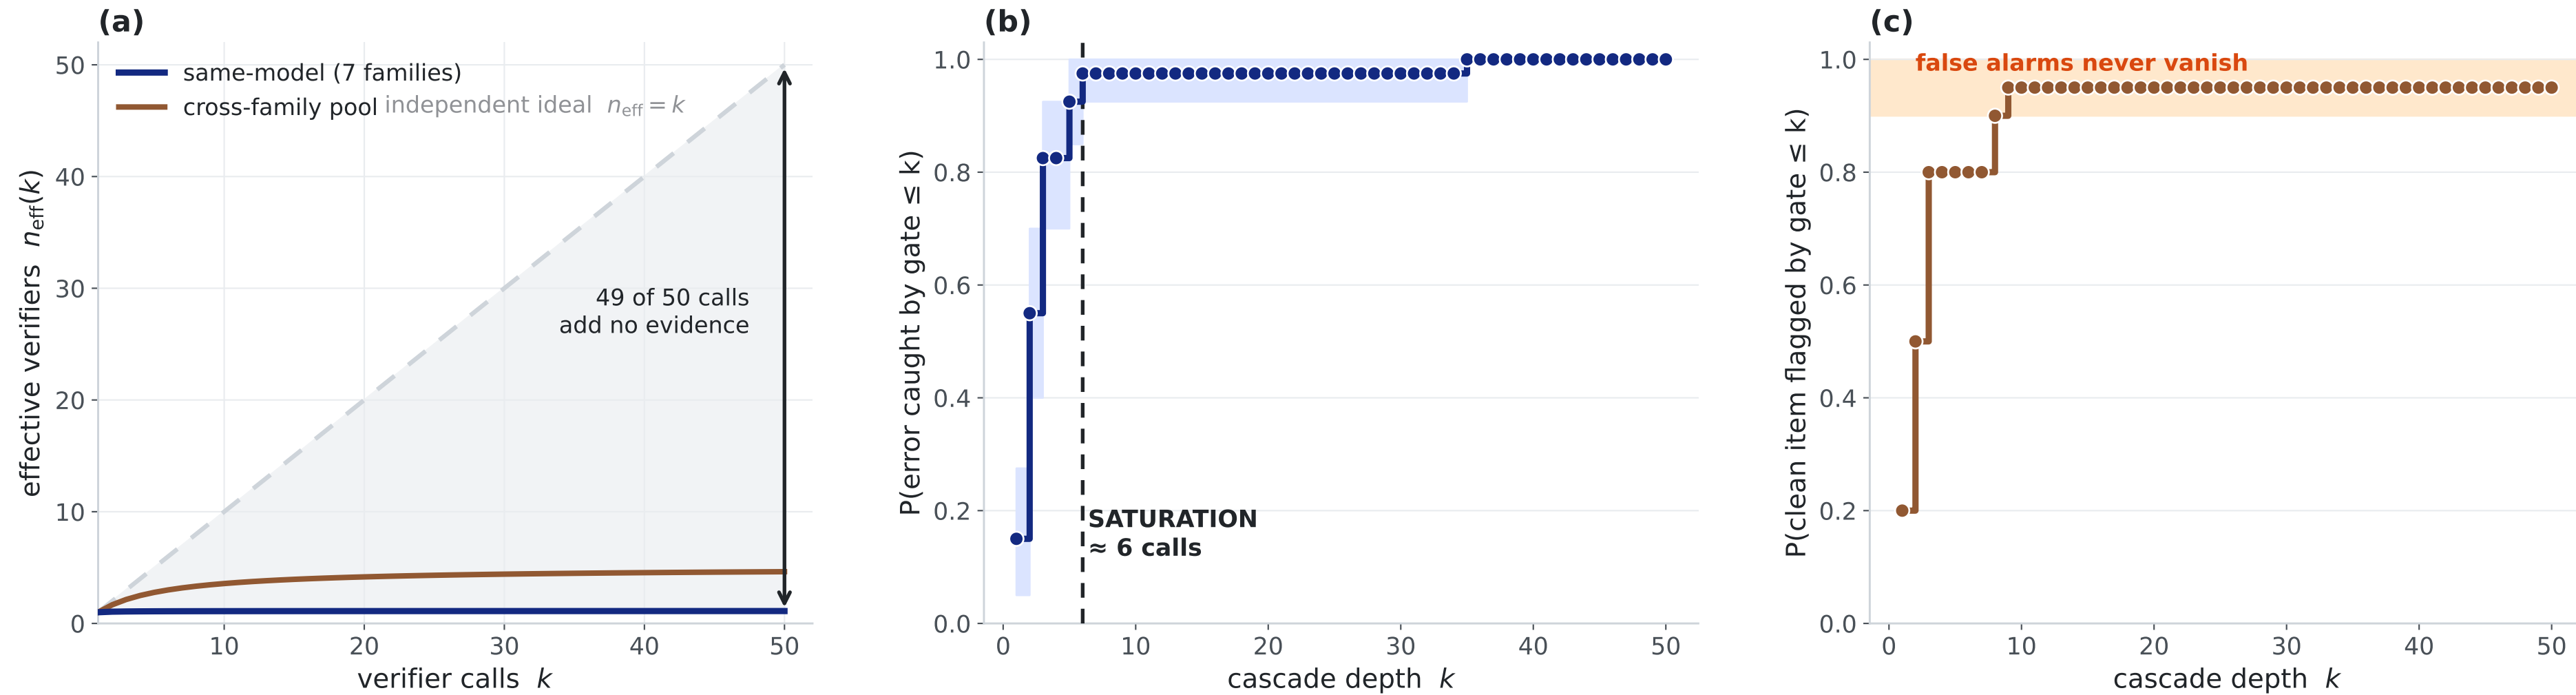

Figure 12 Count $\neq$ diversity $\neq$ value: repetition, then diversity, then conditional value

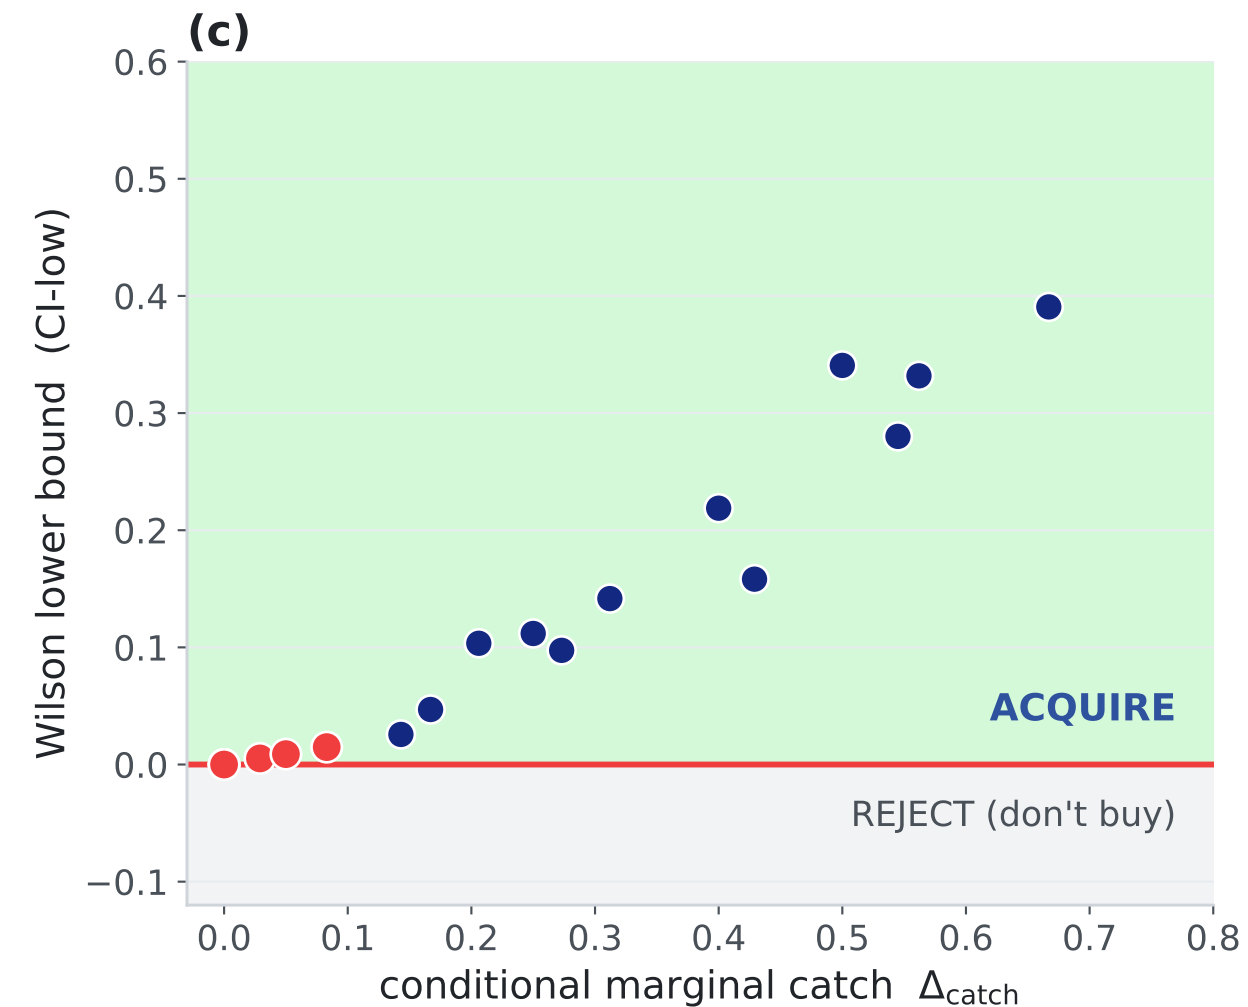

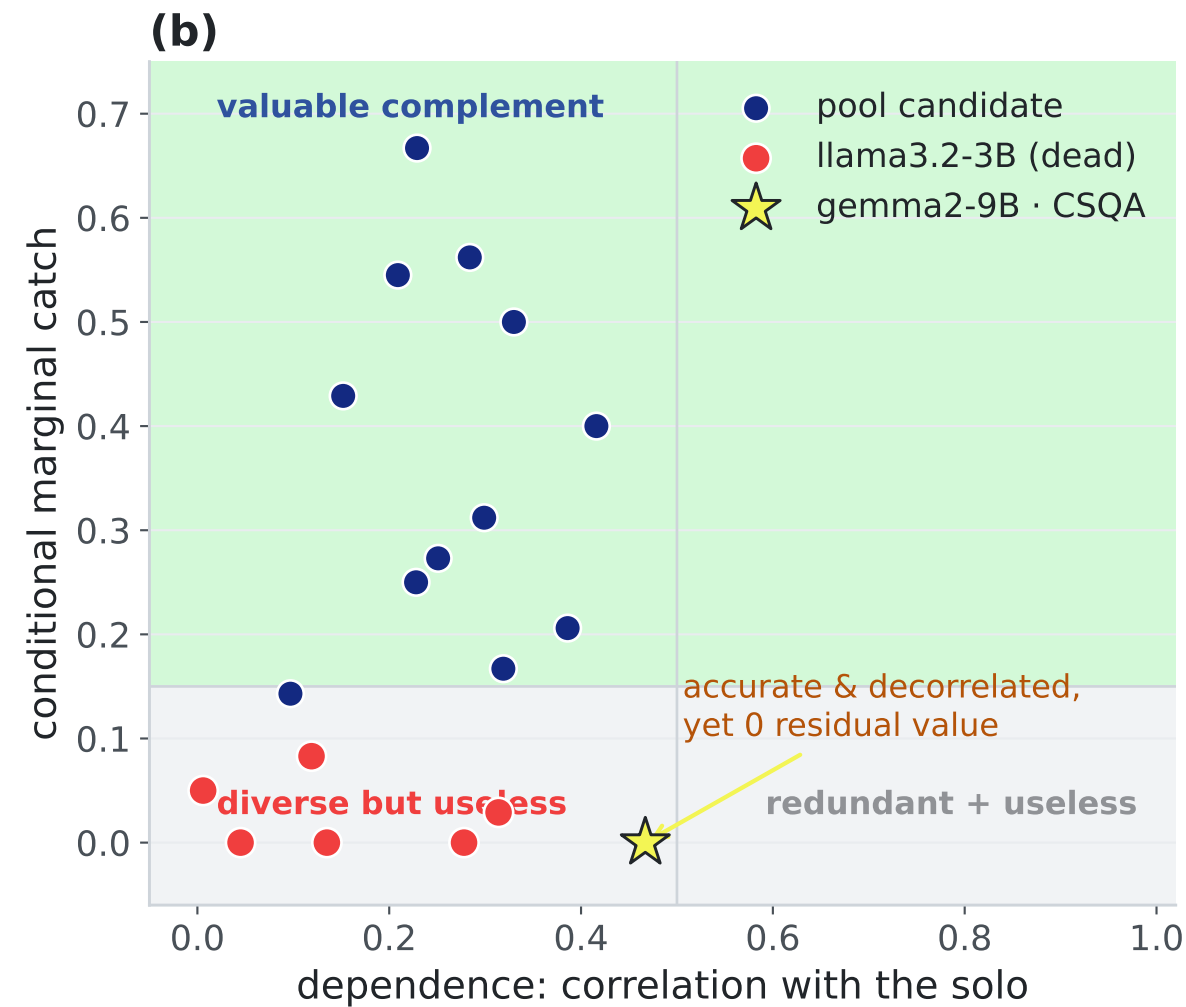

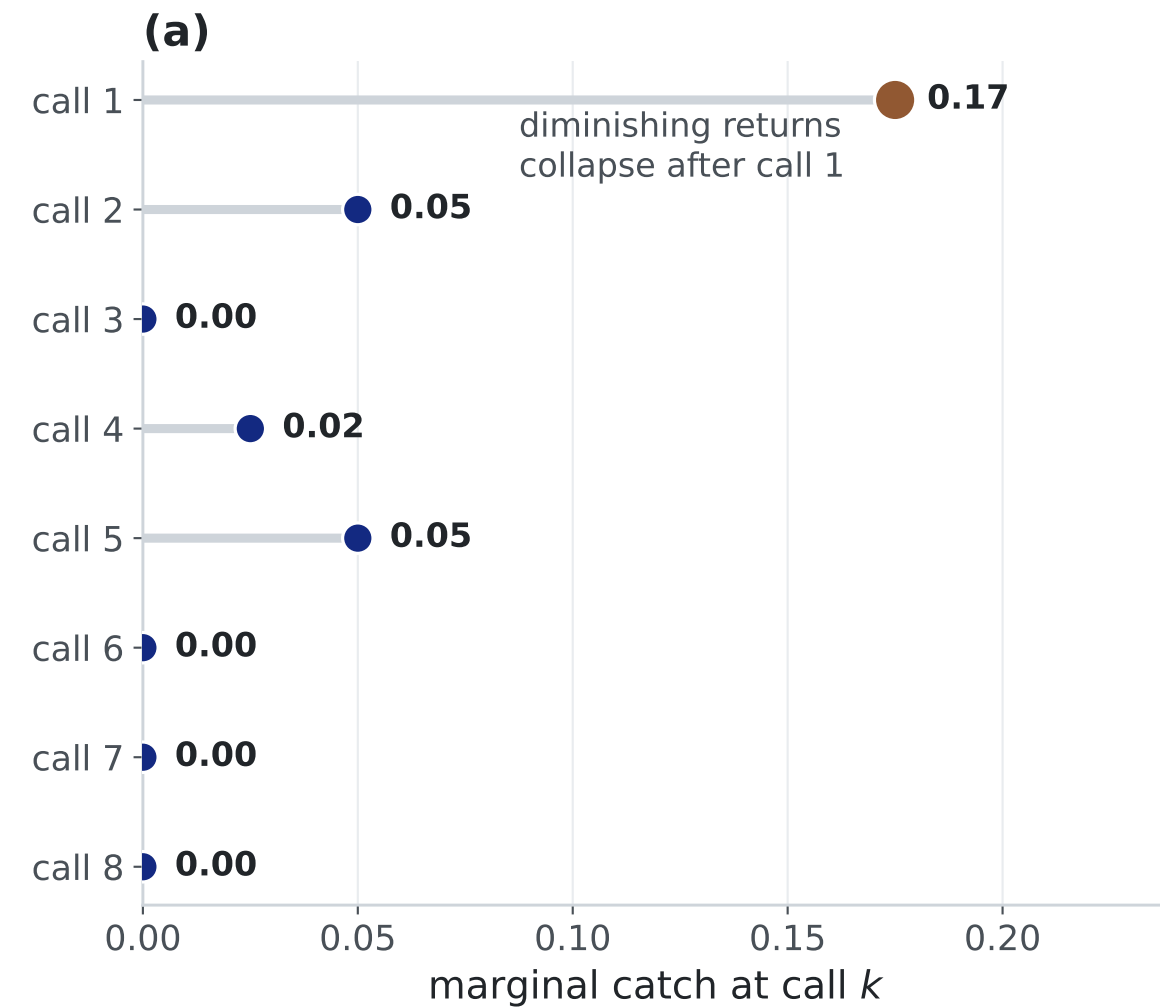

Figure 13 Same-model redundancy replicates across seven families (read each row as a profile)

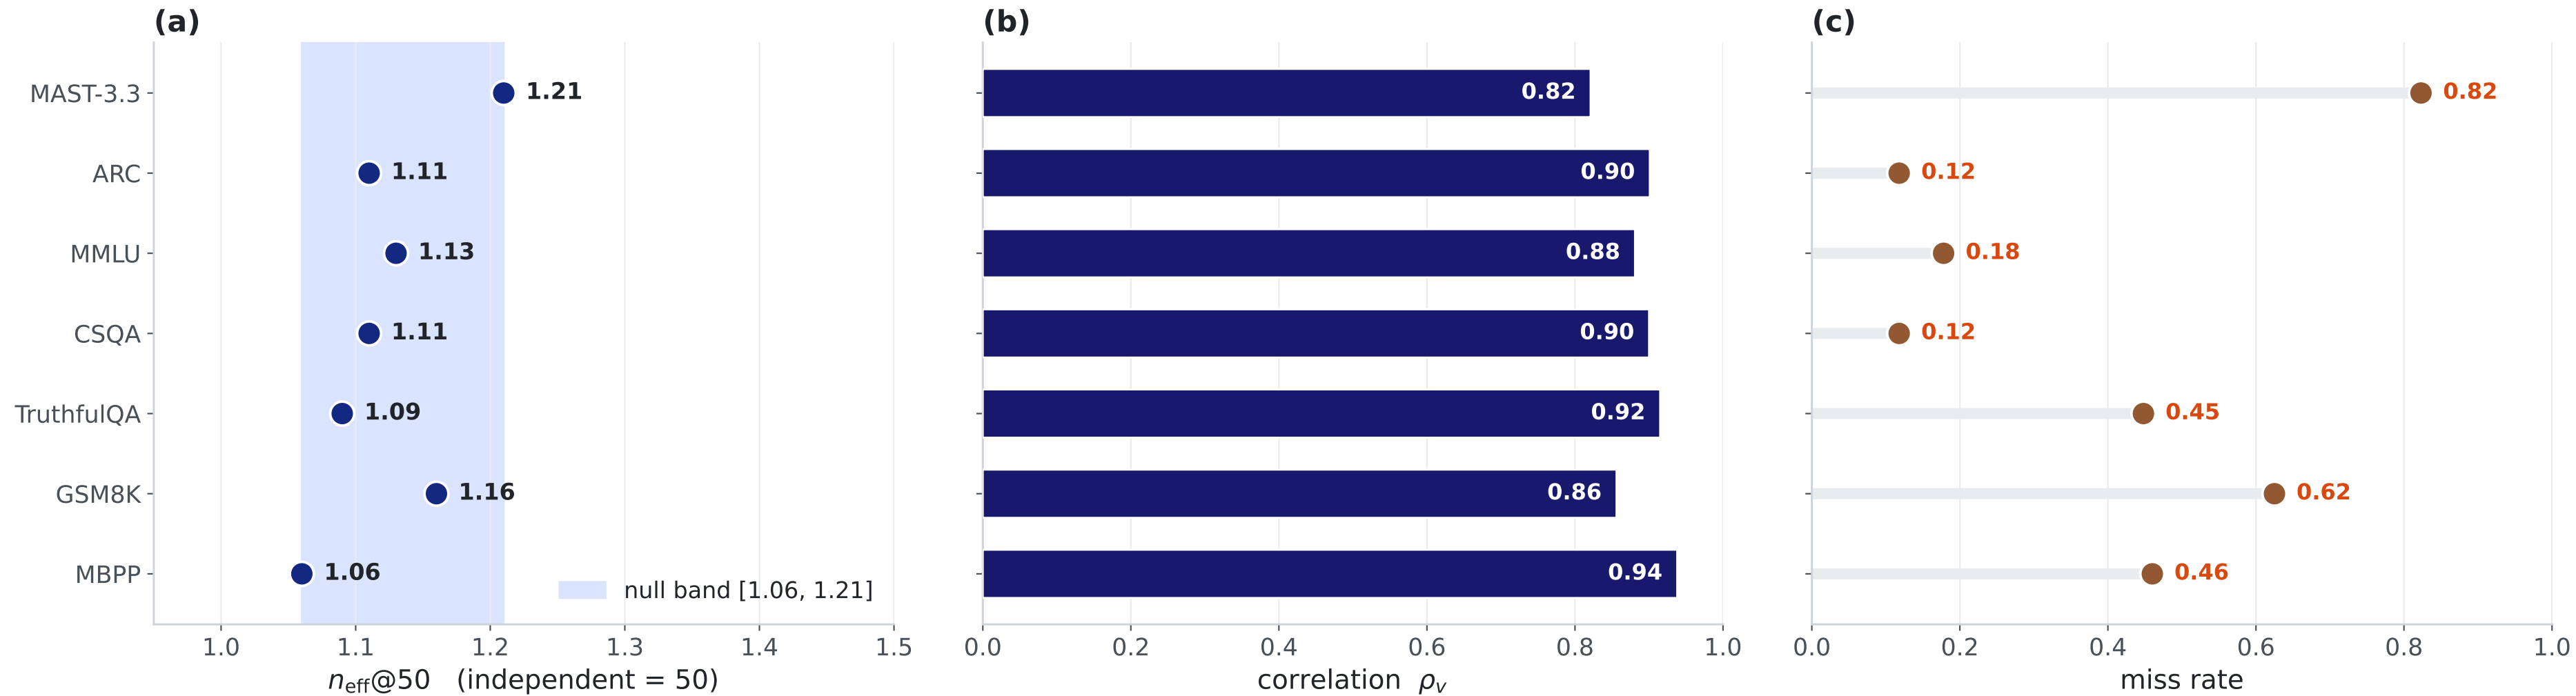

Figure 5 Conditional marginal value selects complementary verifiers
